

Why write courses when you can buy them?

Why spend hundreds of hours of your time writing curriculums? When you could be spending that time selling and marketing your school's brand.

You can have QMT develop your courses and curriculums.

Use our many years of experience in designing, developing and delivering hundreds of U.S. Coast Guard approved training courses and programs.

We have the capability to accurately research subject matter, design the course and most importantly, write the course.

We will deliver every curriculum to you, electronically in the NVIC 03-14 format, ready to submit for approval. All you need to do is add your:

- [Letterhead] Cover Letter;
- Qualified Instructor Information;
- Training Facility Description.

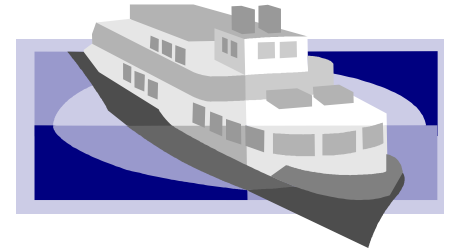

Quality Maritime Training (QMT)

Mariner Training

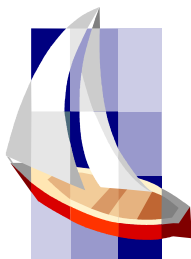

QMT a provider of U.S. Coast Guard approved & STCW compliant training courses.

QMT - Your Training Partner

QMT's Courses/Curriculums

Experience smooth sailing with QMT as your training partner.

Approved Training Courses/Curriculums

Our well proven course development techniques allow us to produce clean, professionally designed and ready for delivery curriculums, quickly and cost efficiently.

Each training course approval request requires the development of a course framework, outlines & schedules, teaching syllabus, course surveys, teaching materials, examinations and/or performance assessment objectives.

QMT delivers each course to you electronically in the NVIC 03-14 format, ready for you to submit for approval to the Coast Guard's National Maritime Center (NMC).

QMT's Experience

QMT's members have been writing, developing and designing curriculums for Coast Guard approval since 1995. We have often been the first to offer many courses before other training providers. Coupled with our regulatory expertise, we accurately foresee coming or new training requirements.

The QSS Requirement

With the new STCW rules in 46 CFR 10.410 Quality Standard System (QSS) requirements & STCW Regulation I/8.

Don't let the STCW QSS requirements deter you, we can help.

46 CFR 10.410(b)(2) "The organization develops their own QSS and the Coast Guard does the oversight."

It is estimated that training providers will need to dedicate at least 206 hours to develop and write their QSS, that's over five work weeks of your valuable time!

QMT intends to develop its own QSS and have the Coast Guard provide the oversight. We see this as the most affordable way for training providers comply by the January 1, 2017 deadline.

QMT can assist you with QSS!

Any of QMT's currently developed courses can be yours! Need other courses?

Let's work together to gain your STCW or other course approvals.
